

# Aqualog+

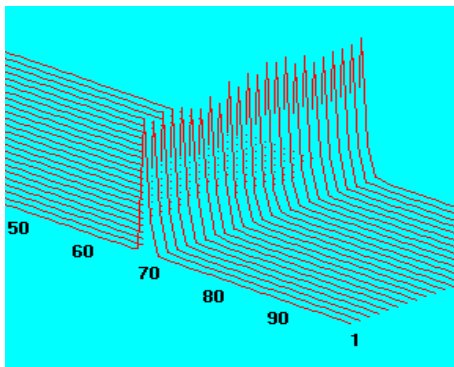

## Advanced Leak Noise Logging Kit

ENVIRONMENTAL MONITORING  
PRESSURE CONTROL  
LEAK DETECTION  
DATA LOGGING  
FLOW MEASUREMENT

### KEY BENEFITS

- Full histogram and 3D noise data
- Fast download via radio
- PDA display and full PC software
- Programming via radio
- Typical 3 years battery life
- Battery replaceable
- Fully customisable logging period
- Up to 28 histograms produced per session for detailed leak analysis.

FCS is pleased to announce the launch of the Aqualog+ advanced leak noise logging kit, featuring extended logging functionality, wireless communication and outstanding data presentation.

Aqualog+ records noise at preset intervals over an extended period of time. Noise trends identified can then be presented in graph format, enabling the user to distinguish clearly between leak and non leak noise.

Programming and download is via radio with no need for connection or placing into the case. Each logger is self powered for three years typical usage after which the batteries can be replaced.

Data is immediately visible on a PDA and can be quickly transferred to a PC running the Aqualog software. This provides current and historical data, with 2D and 3D graphics clearly identifying leakage through noise levels and spread.

Aqualog+ is supplied in a small lightweight case containing 10 loggers, radio download (Patroller), PDA, software and accessories. Further kits of 10 loggers can be added.
