DataGate

Remote Data Management

Manage large data volumes	designed to handle large volumes of SMS/GPRS/LTE-M data traffic
Compatible	works on all devices
Efficient	supports rapid data transmission
Eliminates blockage	by firewalls and spam filters
No host modem	no modem required to receive data
Secure servers	secure archiving of data indefinitely
Detailed message transmission	to enable diagnostic investigation if required
Logger alarms	automatically sent to multiple users
Multiple data sources	FTP, VMN and modem
Online Viewing	Omnicoll or third-party system
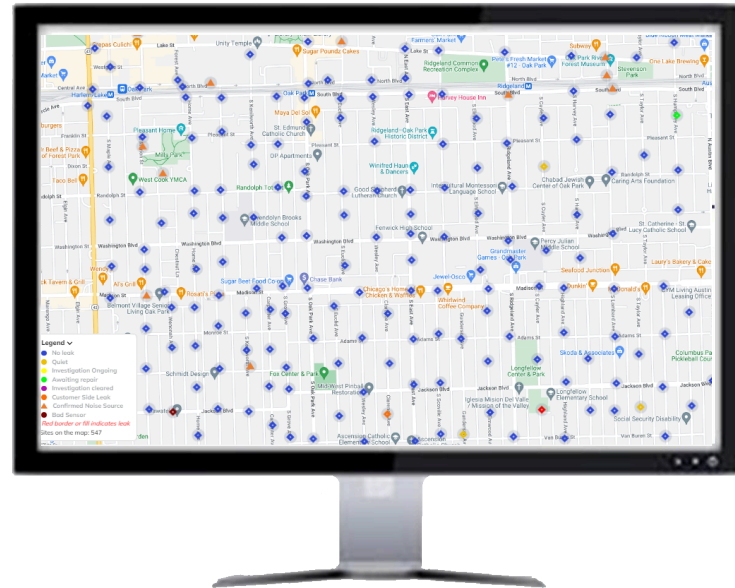

Key Features and Benefits

- **Universal Compatibility**: Operates seamlessly on all mobile networks.

- **Fast Data Transmission**: Delivers quick and efficient data transfer capabilities.

- **Reliable Availability**: Guaranteed 99.99% uptime from the Data Center, ensuring your data is always accessible when needed.

- **Proactive Alerts**: Logger alarms can be automatically sent to multiple users, enabling swift and coordinated responses.

- **Flexible Access**: View data online via Omnicoll or other compatible third-party data management systems.
